We are excited to announce the inaugural solo show by **Ryan Sarah Murphy** at C24 Gallery. *Structural Integrity*, presented in our street level gallery, includes new works from all aspects of Murphy's multidisciplinary practice. Her reclaimed cardboard relief sculptures, powered by the visceral impact of color combinations, act as visual meditations on geographical location, placemaking, architecture and spatial awareness. Her videos, generated through multiple digital interventions on random images and movements, are enigmatic, animated paintings that look like pixels, binary code or even deconstructed maps, a visual reference to her fixed cardboard works. Her drawings, which begin as tracings of stills from her videos, complete the multi-dimensional deconstruction of her creative cycle.
